

Being the leading envelope packaging machine manufacturer in the world in 2024, Jomet has been consistently working on developing new features and options as a response to constantly growing demands in automatization in this industry.

Our team is proud to introduce the brand new Jomet Enpack Gen 2 V! Together with many other new features reaching towards the today's standards, we have put a lot of effort to enhance the user experience and ease-of-use.

What's brand new:

- ✓ Completely new, fresh-looking safety cover design
- ✓ Automatic adjustments to make changing between different formats quick and easy
- ✓ Overhead belt on infeed table for aligning the incoming envelope flow
- ✓ Actively self-adjusting alley, to decrease sensitivity to varying bundle thickness
- ✓ Pressure-sensitive grouping table and gripper, to reduce the need for manual adjusting between different formats and paper batches
- ✓ Two HMI panels, one on both sides of the machine
- ✓ Up-to-date servo technology to provide smooth and precise movements
- ✓ Horizontal, motor-driven carton blank magazine with a case blank capacity of 1300mm
- ✓ Automatic air purge system on all suction cups, to blow out any remains of carton dust
- ✓ Door-specific open door notifications on the HMI

Available as an option:

- ✓ Numerous supported envelope formats
- ✓ Vertical divider sheets
- ✓ Horizontal divider sheet + packing to two layers
- ✓ Rotation tools for many different bundle/row formations in the box
- ✓ Let us know what else you need, and we will check the possibilities with our experienced designing team!

Enpack Gen 2 V specification

- Supported box type Pre-Glued Case FEFCO 0201
- Tape sealing
- Supported envelope features:
 - Paper weight 75-170g/m²
 - Envelope height 93-162mm
 - Envelope length 162-242mm
 - Standard windows (single, "patched" windows with size range from 1" x 4" to 1,5" x 5")
 - Seal flap closed; open flap handling option available
 - For features outside these ranges, multiple windows or other special features → contact Jomet
- Box sizes:
 - Length 310-500mm
 - Width 200-350mm
 - Height 125-340mm
 - For sizes outside these ranges → contact Jomet
- Rows of 500-1000 envelopes supported
- 1-2 rows per layer supported
- Rotation tools available as an option
- Capacity up to 1750 envelopes/min or 4 boxes/min
- Manual packing possibility on infeed table
- Omron NJ/NX series control system
- Electrical supply 3~ 400VAC, 3x25A, 50Hz; transformer for the US/other networks available as an option
- Pneumatic supply 6 bar, R1/2, ISO 8573-1 Class 4
- Dry operating conditions, temperature at least +5°C
- CE marking
- Documentation & HMI in local language
- Tosibox VPN router included (requires an internet connection to be arranged by the customer)
